1. This week I made informal visits to a division chief in OCD and a division chief in ORR for the purpose of giving them some confidential information regarding the attitudes of several trainees now enrolled in UTG/A. Both division chiefs welcomed the opportunity to discuss the current status of their trainees. We agreed that the reports were not serious enough in nature to require further study by other parties at this time. I was extremely pleased with reception I received and the type of questions I received. The division chiefs expressed appreciation for the reports and requested such reporting be continued.
